"Womb Light"

Maysam Al Nasser, *1:1 Architecture and Interiors*

Maysam Al Nasser is a talented young architect and interior designer with a studio in Riyadh at Mall A'ali. She likes minimalist Japanese design, yearns for old Arabia, and strives for modernism, so her designs are an eclectic blend of many influences. She is also an advocate for sustainable trends like recycling and upcycling, and nowhere is this better displayed than in her own studio.

Maysam's furniture designs are conceptual, experimental, and most of all, fun. "Each piece has a story and a concept," she says. "Every time we start designing, we find ourselves challenging material characteristics—provoking the laws of physics, gravity, logic, and the conventional use of furniture to test ourselves and our boundaries. Our pieces also address the continuous conversation between traditional and contemporary, organic and defined."
